Subject: microsoft settlement

I find the persecution of Microsoft an abomination of free enterprise. Microsofts bundling of their products is a procedure that has been followed by many manufacturers since day one. But the idea that a man like Bill Gates can utilize the system and become the richest man in the world causes our current socialist government fits. This is totally un-American. You are supposed to be free to be all you can be in this country. Apparently, not!

Totally disgusted,
George Salisbury
